MEASURING THE IMPACT OF YOUR SCHOOL'S ICT ON TEACHING AND LEARNING

BACKGROUND

Do you know the effect your ICT service is having on your key outputs of Teaching and Learning? Can you measure the output? Do you know where it is working well and where it has challenges? Do you know what those challenges are? Do you have a strategic delivery plan and do you know why you are taking your ICT service in a certain direction and investing in certain areas?

The key to answering these questions is to know what impact your current ICT Service is having on teaching and learning - today.

Developed as a required output from a national programme the ICT Impact Service has run successfully over 5 years – it has measured developments in ICT across schools and helped shape strategy and key decisions and investments for school leaders.

It enables schools to shape strategies and also link with national programmes.

AIMS

The Aim of the Impact review is to cut to the chase and accurately measure how effective your ICT resource is in enhancing your Teaching and Learning so that you can make evidence based decisions to support pupils and staff.

By identifying areas of concern we can help you best allocate resources to better develop the service.

WHAT YOU WILL GET

- Assessment of where your current delivery is against a national benchmark
- Identify strengths and weaknesses in current cross curricular ICT teaching
- Identify strengths and weaknesses in current cross curricular ICT learning
- Support in understanding areas in need of investment and support
- Report on current Impact of ICT on Teaching and Learning

HOW WE WILL WORK WITH YOU

To achieve your bespoke plan there are 4 key parts;

- Introduction and description of assessment criteria
- Review of assessment of school evidence
- Interviews
- Feedback on results and presentation of relevant development plan.

RELATED SERVICES

- ICT Mark Evaluation and Assessment support
- Cross curricular mapping support
- eSafety Evaluation and Assessment support
